SUMMARY

Outside-of-the-box thinker with a drive and passion for building intuitive and customer engaging apps. Organization and communication skills cement strong leadership abilities. Loves being part of a team who works together to accomplish great things. Has an immense thirst for knowledge and enjoys sharing it with the team and others. Strong in JavaScript, React, React Native, CSS, and SASS.

Skills

Languages	JavaScript, Python, SQL, HTML, CSS, SASS
Frameworks	Express, Node, Django, Vue
Libraries	React, React Native, Redux, jQuery, Materialize, Bootstrap
Databases	PostgreSQL, Sequelize, MongoDB, Mongoose
Other	AJAX, Axios, Git, Heroku, RESTful Web Services, HTML Canvas, CSS Grid

Project Highlights

My Golf Tracker - React Native App

October 2018

A golf app that tracks your rounds and generates your handicap index as well as a course handicap per teebox. The frontend was built using React Native and hits the backend api that was built with Node/Express. Navigation and swiping were custom built rather than using libraries. Makes use of Promises and AsyncStorage for persistent login.

rand-num-gen - NPM module

September 2018

Created an npm module that generates a random number and has options for returning an integer vs a float, the length of the decimal, and allows skipping numbers.

Visio Infographic - Indigo Slate (for Microsoft)

August 2018

Responsible for delivering the entire infographic, including logic, style, responsiveness, and animations. Followed design to ensure pixel perfect site as well as added extra features and animations to make site lively, including custom accordion and sticky side button.

Sticky Board

July 2018

A React and Node/Express app, Sticky Board is a place to write down quick notes and move them around on your own personal sticky board. Using React Draggable to drag around components, Sticky Board saves the position of your Stickies using MongoDB with Mongoose..

Technical Experience

Indigo Slate, Bellevue, WA

August 2018

As a contracted front end developer, this role entailed building multiple front end sites for Microsoft, an Indigo Slate client. In addition to developing, this involved brainstorming meetings about what animations could be added and how best to meet the client's wants while staying within the deadline. As lead developer on these projects, responsibilities included time management amongst developers and designers to keep away scope creep, fully meeting design specs, ensuring full responsiveness, addressing all of the customer's needs, and overall making the project pixel perfect.

Education

General Assembly

Web Development Immersive
2018

480+ hour, project-focused web development bootcamp. Learned two coding languages and multiple frameworks, libraries, databases, and other web development principles.

University of Florida

B.A. - French
2009

Non-Technical Roles

Application Solution Consultant

AT&T

2014-2017

Consulted businesses about their technical needs.

Virtual Cloud Specialist

AT&T

2012-2014

Managed cloud sales funnel for the Western Region.

Retail Sales Consultant

AT&T

2010-2012

Worked with customers to suggest best phone and work through phone issues.

Other Activities

Musician/producer (guitar, drums, keys, saxophone, Logic Pro X), Crossfit athlete and coach, snowboarder
